

DIMAS PITERA ARIYANTO

FULL STACK DEVELOPER (LARAVEL / PHP / PYTHON / NODE / NEXT / REACT / JAVASCRIPT)

Daerah Istimewa Yogyakarta, Indonesia | +62 896-7536-5809 | dimas_pitera@yahoo.com | [linkedin.com/in/dimas-pitera-ariyanto-6a4513220](https://www.linkedin.com/in/dimas-pitera-ariyanto-6a4513220) | github.com/DimasPiteraAriyanto | portofolio-wheat-zeta-54.vercel.app

PROFESSIONAL SUMMARY

Results-driven Full Stack Web Developer with nearly 5 years of experience architecting, building, and maintaining end-to-end web applications. Expert in PHP (Laravel & CodeIgniter), JavaScript ecosystems (React.js, Tailwind CSS), and RESTful API integration. Proven track record in optimizing database performance, implementing responsive UI/UX, automating CI/CD pipelines, and leading technical projects from concept to multi-server deployment.

TECHNICAL SKILLS

Full Stack Engineering	PHP (Laravel, CodeIgniter), JavaScript, React.js, Tailwind CSS, RESTful APIs, OOP, Nodejs, Next.js, State Management, Python.
Databases	MySQL, PostgreSQL, MongoDB (NoSQL), Database Architecture & Query Optimization
DevOps & Tools	Git, CI/CD Pipelines, Trello, Docker Basics, AI Coding Tools (ChatGPT, Claude, Gemini)
Professional Skills	Technical Leadership, Bilingual Mentoring (EN/ID), Requirements Gathering, SDLC Management

WORK EXPERIENCE

Full Stack Programmer IT Training Instructor Tech Institute / Company Name	March 2024 – Present Yogyakarta, Indonesia
- Developed end-to-end web applications combining robust Laravel/CodeIgniter backends with modern React.js and Tailwind CSS frontends. - Architected RESTful APIs and established automated CI/CD pipelines to streamline cross-functional development cycles. - Designed relational (MySQL/PostgreSQL) and NoSQL (MongoDB) schemas, improving query execution and frontend load times. - Mentored 20+ trainees per batch in bilingual IT sessions (English/Indonesian), teaching full stack development best practices.	
Project Manager Fullstack Web Developer Software House / Company Name	February 2022 – February 2024 Yogyakarta, Indonesia
- Led full SDLC for client applications, transforming requirements into technical blueprints and responsive user interfaces. - Engineered business applications using PHP, JavaScript, and MySQL, optimizing operational workflows for key stakeholders. - Managed Agile sprints via Jira and Git, ensuring seamless deployment across multi-server environments.
